

reduce energy use  
and manage costs with the

# 4U2 PROGRAM

Minnesota Energy Resources is offering up to \$5,000 per qualified household to make homes more comfortable, affordable and energy efficient. This is an investment to improve your home and our community. **This is 4U2.**

Everyone is trying to save money these days. It's the smart thing to do. And one of the smartest ways to save on your monthly bills is to reduce your energy costs. Minnesota Energy Resources can help you make the necessary improvements to your home so you can reduce your energy use and save on your monthly bills.

The 4U2 Program starts with an energy audit to identify weatherization measures that will make your home more comfortable and energy efficient. You will be asked to provide only a small co-pay for the audit if, and only if, energy-saving measures are identified. If no measures are identified, you don't pay a dime.

**PLUS, we will cover the installation** of every cost-effective energy-saving measure identified by the audit—up to \$5,000 per qualified household! If it calls for insulation,

we'll install it. Need your windows sealed? We'll caulk and seal them. You pay only \$100 of the total costs, no matter how much work is needed.

What do you have to lose? If you are a fixed-income customer and would like to find new ways to reduce your monthly energy costs, let us help. We will invest our time and money to make it happen.

**Enroll in the 4U2 Program today! It's confidential and easy. Just call this toll-free phone number to see if you qualify.**
