

Direct Testimony and Schedules
Ted F. Prosser

Before the Minnesota Public Utilities Commission
State of Minnesota

In the Matter of the Application of Minnesota Energy Resources Corporation for
Authority to Increase Rates for Natural Gas Service in Minnesota

Docket No. G011/GR-22-504

Exhibit ____ (TFP-D)

**Service Line Mapping Project, Rochester and Worthington Projects,
Farm Tap Project, and
Main and Service Extensions**

November 1, 2022

1 **I. INTRODUCTION AND QUALIFICATIONS**

2 Q. PLEASE STATE YOUR NAME AND BUSINESS ADDRESS.

3 A. My name is Ted F. Prosser. My business address is WEC Energy Group, Inc.
4 (“WEC”), 700 North Adams Street, P.O. Box 19001, Green Bay, Wisconsin
5 54307-9001.

6
7 Q. PLEASE DESCRIBE YOUR EDUCATIONAL, PROFESSIONAL, AND UTILITY
8 BACKGROUND.

9 A. I have a bachelor’s degree in Engineering from the Milwaukee School of
10 Engineering. I began my career with WEC subsidiary Wisconsin Public Service
11 Corporation (“WPS”) in May 1992 in the Gas Engineering Department, first as an
12 Associate Engineer and then as a Division Operations Engineer. In December of
13 2017, I assumed my current role in Gas Operations as Manager Gas Engineering
14 for WEC Corporations Michigan Gas Utilities, Minnesota Energy Resources, We
15 Energies, and Wisconsin Public Service gas utilities.

16
17 Q. ON WHOSE BEHALF ARE YOU OFFERING THIS TESTIMONY?

18 A. I am offering this testimony on behalf of Minnesota Energy Resources
19 Corporation (“MERC” or the “Company”).
20

1 Q. WHAT IS THE PURPOSE OF YOUR DIRECT TESTIMONY?

2 A. First, I provide updates regarding the status the following projects:

3 1. MERC's Mapping Project, including addressing compliance requirements
4 from MERC's last rate case, Docket No. G011/GR-17-563 ("2017 Rate
5 Case");

6 2. The Farm Tap Replacement Project (the "Farm Tap Project"), which was
7 approved by the Minnesota Public Utilities Commission (the
8 "Commission") in Docket No. G011/M-17-409;

9 3. The Rochester Natural Gas Extension Project (the "Rochester Project"),
10 which was approved by the Commission in Docket No. G011/M-15-895;

11 4. MERC's Worthington Lateral Project, which was completed in 2020 to
12 provide needed additional capacity to serve customers in the Worthington
13 area;

14 5. MERC's Sewer Cross Bore Survey Project (the "Sewer Cross Bore
15 Project"); and

16 6. The PragmaCAD ("PCAD") Mobile Workforce Management Project.

17

18 Second, I provide the information relating to MERC's main and service extension
19 policies and practices and discuss the Company's extension-related additions to
20 rate base as set forth in Docket No. G-999/CI-90-563 ("Docket 90-563"). This
21 includes a discussion of the Company's collection of contributions-in-aid-of-
22 construction ("CIAC") and abnormal construction charges related to main line and
23 service line extensions.

Third, I address the Commission’s filing requirement in Docket No. G-007,011/M-07-1188 regarding winter construction charges.

Fourth, my testimony provides a discussion of the farm tap inspection program. In Docket No. G-011/M-91-989, the Commission required the Company to provide, in each general rate case, a five-year report on the cumulative results of the farm tap inspection program and any recommendations for future improvements.

Q. ARE YOU SPONSORING ANY SCHEDULES IN CONNECTION WITH YOUR TESTIMONY IN THIS PROCEEDING?

A. Yes, I am. I am sponsoring:

- Exhibit ____ (TFP-D), Schedule 1: Rochester Project Costs through July 31, 2022
- Exhibit ____ (TFP-D), Schedule 2: Results of Service Line Extension Review,
- Exhibit ____ (TFP-D), Schedule 3: Results of Main Extension Review,
- Exhibit ____ (TFP-D), Schedule 4: Abnormal Construction Charges,
- Exhibit ____ (TFP-D), Schedule 5: Winter Construction Charges Outside of Winter Period, and
- Exhibit ____ (TFP-D), Schedule 6: Minnesota Farm Tap Inspection Program Statistics 2017-2021.

21

Q. WERE THESE SCHEDULES PREPARED BY YOU OR UNDER YOUR DIRECTION AND SUPERVISION?

A. Yes, they were.

Q. PLEASE GENERALLY DESCRIBE THE CONTENT OF EXHIBIT ____ (TFP-D), SCHEDULE 1.

A. Exhibit ____ (TFP-D), Schedule 1 provides a breakout of costs for MERC's Rochester Natural Gas Expansion Project through July 31, 2022 for each phase of the Rochester Project.

Q. PLEASE GENERALLY DESCRIBE THE CONTENT OF EXHIBIT ____ (TFP-D), SCHEDULE 2.

A. Exhibit ____ (TFP-D), Schedule 2 presents the results of MERC's service line extension review.

Q. PLEASE GENERALLY DESCRIBE THE CONTENT OF EXHIBIT ____ (TFP-D), SCHEDULE 3.

A. Exhibit ____ (TFP-D), Schedule 3 presents the results of MERC's main line extension review.

1 Q. PLEASE GENERALLY DESCRIBE THE CONTENT OF EXHIBIT ____ (TFP-D),
2 SCHEDULE 4.

3 A. Exhibit ____ (TFP-D), Schedule 4 presents the results of MERC's review of
4 abnormal construction charges.

5
6 Q. PLEASE GENERALLY DESCRIBE THE CONTENT OF EXHIBIT ____ (TFP-D),
7 SCHEDULE 5.

8 A. Exhibit ____ (TFP-D), Schedule 5 documents that MERC's review found no winter
9 charge invoices for work completed outside the tariffed Winter Construction
10 charge period.

11
12 Q. PLEASE GENERALLY DESCRIBE THE CONTENT OF EXHIBIT ____ (TFP-D),
13 SCHEDULE 6.

14 A. Exhibit ____ (TFP-D), Schedule 6 presents the results of MERC's farm tap
15 inspection program for the period 2017-2021.

16

17 **II. MAPPING PROJECT**

18 Q. WHAT IS THE PURPOSE OF THIS SECTION OF YOUR TESTIMONY?

19 A. In this section of my Direct Testimony, I provide an update on the status of
20 MERC's mapping project and address compliance requirements related to the
21 Mapping Project from the Commission's December 26, 2018 Findings of Fact,
22 Conclusions, and Order in Docket No. G011/GR-17-563, which required:

1 In its next rate case, MERC shall file detailed information
2 regarding the status of the Mapping Project and associated
3 costs, including:

- 4
5 (1) a full discussion of both phases of the Mapping Project;
6 (2) the status of the Mapping Project;
7 (3) the actual costs by year and the reasons for variances from
8 forecasted amounts beginning with 2016;
9 (4) the projected costs in the test year and how determined;
10 (5) the actual and projected costs and how determined for the
11 year immediately before the test year;
12 (6) the portion of that year's costs performed by external
13 contractors by year; and
14 (7) any other evidence to support MERC's Mapping Project
15 costs.¹
16

17 Q. PLEASE PROVIDE AN OVERVIEW OF MERC'S MAPPING PROJECT.

18 A. MERC's Mapping Project is a comprehensive effort to verify, compile, and map
19 MERC's gas main and service line data, and ultimately link the service line data
20 to the Company's Geographic Information System ("GIS"). The Mapping Project
21 is an important step in the Company's efforts to "understand system design and
22 material characteristics, operating conditions and environment, and maintenance
23 and operating history," in accordance with the United States Department of
24 Transportation Pipeline and Hazardous Materials Safety Administration's
25 ("PHMSA's") Integrity Management Program for Gas Distribution Pipelines Rule
26 (49 C.F.R. Part 192, subpart P). 49 C.F.R. 192.1007(a)(3) of PHMSA's Gas
27 Distribution Integrity Management Program ("DIMP") regulations require natural
28 gas system operators to identify additional information needed and to develop a

¹ *In the Matter of the Application of Minn. Energy Res. Corp. for Auth. to Increase Rates for Natural Gas Serv. in Minn.*, Docket No. G-011/GR-17-563, Findings of Fact, Conclusions, and Order at Order Point 29 (Dec. 26, 2018).

1 plan for gaining that information over time through normal activities including
2 design, construction, and operations or maintenance activities. MERC's Mapping
3 Project is intended to compile available information and to allow the Company to
4 identify additional information necessary to understand and address risks on the
5 Company's system.

6
7 In Docket Nos. G011/GR-15-736 and G011/GR-17-563, MERC previously
8 requested and received approval to recover in base rates a portion of costs for
9 the two initial phases of its Mapping Project. The first phase related to
10 developing the mapping systems and data that MERC's field personnel utilize to
11 locate mains, manage outages, determine flow modeling, and undertake other
12 critical infrastructure tasks. To improve the quality and utilization of the mapping
13 systems, this phase of the Mapping Project involved verifying as-built drawings
14 and field data for main. This information allows MERC to verify age, materials,
15 fittings, and similar system components of mains, and supports required
16 Minnesota Department of Transportation reporting. The second phase of the
17 Mapping Project, which began in 2016, involved reviewing paper service line
18 documentation, entering service line information into a database, and verifying
19 records already in the database. This second phase is necessary to enable
20 future mapping and linkage to MERC's GIS.

21
22 The third phase of the Mapping Project is a multi-year effort, first proposed in
23 Docket No. G011/M-20-405, to map the presumed location of Company service

1 lines based on known meter and main locations and use available technology to
2 begin linking the service line information to the Company's GIS. This third phase
3 is necessary to get the service line information compiled in phase 2 into a system
4 capable of linking to the GIS system, and to actually map the location of service
5 lines into GIS. Completion of the third phase of the Mapping Project is necessary
6 to address identified data gaps, allow ongoing updates for new and altered
7 service lines on MERC's system to allow the Company to identify and track risks,
8 and to help prevent third-party damage from excavation activities.

9
10 Q. WHAT COSTS WAS MERC AUTHORIZED TO RECOVER IN THE 2017 RATE
11 CASE RELATED TO THE MAPPING PROJECT?

12 A. In Docket No. G011/GR-17-563, the Commission authorized MERC to recover
13 \$178,563 in expense related to the Mapping Project.

14
15 Q. HAS MERC BEEN AUTHORIZED TO RECOVER OTHER COSTS RELATED
16 TO THE MAPPING PROJECT?

17 A. Yes. In Docket No. G011/M-20-405, the Commission authorized MERC to
18 recover annual costs of \$1 million for phase 3 of the Mapping Project through the
19 Company's Gas Utility Infrastructure Rider ("GUIC"), offset by \$178,563 to
20 recognize the level of Mapping Project cost recovery included in base rates. This
21 results in forecasted costs of \$821,437 authorized to be recovered through the
22 GUIC Rider. MERC delayed implementation of the service line mapping project
23 until it received Commission approval to proceed with that project as part of the

1 Company's GUIC rider filings. Because the Commission's order in Docket No.
2 G011/M-20-405 was not issued until November 2021, implementation of this
3 project was delayed and no work was completed and no costs were incurred in
4 2021. Costs related to the project also were not included in the Company's
5 recovered GUIC Rider surcharge rates in advance of the December 1, 2021
6 implementation of 2021 GUIC Rider surcharge rates. In Docket No. G011/M-21-
7 232, MERC proposed to continue work on the Mapping Project in 2022 with
8 recovery through the 2022 GUIC rider. As of September 2022, that filing was
9 pending.

10
11 Q. WHAT IS THE CURRENT STATUS OF THE MAPPING PROJECT?

12 A. In its 2021 GUIC Rider filing, Docket No. G011/M-20-405, MERC proposed to
13 begin the third phase of the Mapping Project. Specifically, MERC proposed a
14 multi-year effort to map the presumed location of Company service lines based
15 on known meter and main locations and use available technology to begin linking
16 the service line information to the Company's GIS. As discussed above, this
17 scope of work is necessary to link the service line information compiled through
18 the second phase of the Mapping Project and to actually map the location of
19 service lines into GIS. The Company plans to use a third-party contractor to
20 validate the location of the presumed lines and ensure the accuracy of the
21 mapped service lines in GIS. While MERC originally proposed to begin this effort
22 in 2021 based on preliminary cost estimates for this scope of work, MERC
23 delayed implementation of the service line Mapping Project because the

1 Company had not received Commission approval for this continued work until the
2 Commission issued its decision in Docket No. G-011/M-20-405 on November 4,
3 2021.²

4
5 In 2022, MERC is analyzing the available data that was compiled in previous
6 phases of the Mapping Project in preparation for migrating into a system linked to
7 the GIS system. The analysis is an effort to align customer data such as address
8 and account with service line data such as material and diameter so that they
9 can be linked as one record in the database. This effort is necessary in order to
10 scope the third phase of the Mapping Project, which will include merging the data
11 sources with linkage to the GIS and customer information system.

12
13 MERC has forecasted \$1 million in costs for proposed work related to the GIS
14 Mapping Project in 2023. The Company initially proposed to recover 2023
15 Mapping Project costs through its GUIC rider in Docket No. G011/M-22-127.

16 However, with the filing of this general rate case, MERC has proposed to roll all
17 of its GUIC rider costs into base rates with interim rates, and to withdraw its 2023
18 GUIC Rider petition.

19

² *In re Petition of Minnesota Energy Resources Corporation for Approval of a Gas Utility Infrastructure Cost Rider True-Up Report for 2019, 2021 GUIC Rider Revenue Requirements and Revised Surcharge Factors*, Docket No. G-011/M-20-405, Order Approving GUIC Costs with Modifications and Requiring Compliance Filing (Nov. 4, 2021).

1 Q. WHAT WERE MERC'S ACTUAL ANNUAL MAPPING EXPENSES BEGINNING
2 WITH 2016?

3 A. The following table provides the actual and forecasted costs by year since 2016
4 and provides the variance from the forecasted amount.
5

6 **Table 1. Annual Mapping Project Expenses (2016 – 2021)**

Year	Forecast	Actual	Variance
2016	\$600,000	\$458,073	\$141,927
2017	\$200,000	\$174,050	\$25,950
2018	\$178,563 ³	\$131,516	\$47,047
2019	\$178,563	\$152,546	\$26,017
2020	\$178,563	\$28,429	\$150,134
2021	\$247,016 ⁴	\$0	\$247,016

7

8 Q. WHAT ARE THE REASONS FOR THE ANNUAL VARIANCES AS SHOWN IN
9 TABLE 1?

10 A. The reasons for these variances are as follows:

- 11 • 2016: Actual costs were approximately \$142,000 below MERC's 2016 test
12 year estimate due to the timing of when contractors were hired. In 2016, ten

³ Approved in Docket No. G011/GR-17-563.

⁴ Inclusive of the \$178,563 approved for recovery in base rates in Docket No. G011/GR-17-563 and 1/12 of the amount approved in Docket No. G011/M-20-420 (\$821,437/12, or \$68,453) to reflect December 2021, the one month during which the 2021 GUIC rider was in effect.

1 contractors began work in July for the service line portion of the project, and
2 continued that work through the end of the year.

- 3 • 2017: Timing and availability of contract labor.
- 4 • 2018: Timing and availability of contract labor.
- 5 • 2019: Timing and availability of contract labor.
- 6 • 2020: Contract employees only worked through the beginning of the year.
7 COVID-19 policies on working from the office shortened the amount of work
8 planned.
- 9 • 2021: MERC delayed implementation of phase 3 of the Mapping Project
10 until it received Commission approval to proceed with that project. Because
11 the Commission's order approving GUIC recovery of a portion of Mapping
12 Project costs was not issued until November 2021, implementation of this
13 project was delayed from the Company's initial proposal to commence that
14 work in January 2021. Costs related to the Mapping Project also were not
15 included in the Company's recovered GUIC Rider surcharge rates in
16 advance of the December 1, 2021 implementation of 2021 GUIC Rider
17 surcharge rates.

18

19 Q. HAS MERC USED EXTERNAL CONTRACTORS TO PERFORM WORK FOR
20 THE MAPPING PROJECT?

21 A. Yes, MERC used contractors in 2016 for researching and documenting gas main
22 as-built information as well as for service line information. The gas main work

1 was completed in 2016, while the gas service line work, which also used
2 contractors, continued into 2020.

3
4 Q. FOR THE YEARS IN WHICH THE COMPANY USED EXTERNAL
5 CONTRACTORS, PLEASE PROVIDE THE PORTION OF THAT YEAR'S
6 COSTS PERFORMED BY EXTERNAL CONTRACTORS.

7 A. Table 2 below provides this information.

8 **Table 2. Costs Performed by External Contractors**

Year	Total Actual Cost	External Contractor Costs
2016	\$458,073	\$420,169
2017	\$174,050	\$168,609
2018	\$131,516	\$122,416
2019	\$152,546	\$133,983
2020	\$28,429	\$23,101
2021	\$0	\$0

9
10 Q. WHAT ARE THE ACTUAL AND PROJECTED COSTS FOR 2022 AND HOW
11 DID THE COMPANY DETERMINE THESE COSTS?

12 A. MERC has forecasted costs of \$45,000 in 2022 to evaluate and scope the next
13 phase of the project to transfer the data created in the prior phases into a live
14 database with linkage to the GIS system and Customer Information System
15 ("CIS"), and to develop detailed cost estimates to begin that work in 2023. Costs
16 for work to be completed in 2022 were determined through a request for quote
17 based on a defined project scope.

1 Q. WHAT ARE THE PROJECTED COSTS INCLUDED IN THE 2023 TEST YEAR
2 AND HOW DID THE COMPANY DETERMINE THOSE COSTS?

3 A. MERC has forecasted \$1 million in costs for proposed work related to the GIS
4 Mapping Project in 2023 to continue the next phase of the Mapping Project to
5 map the presumed location of service lines to the Company's GIS and verify the
6 mapped location of said lines in order to have a more accessible and accurate
7 system of records regarding service line installations, materials, and
8 maintenance.

9
10 Q. HOW IS MERC ADDRESSING RECOVERY OF MAPPING PROJECT COSTS
11 IN THIS CASE?

12 A. As discussed in the direct testimony of Company witnesses Ms. Joylyn Hoffman
13 Malueg and Mr. Joseph Zgonc, respectively, MERC is proposing to terminate the
14 GUIC rider effective January 1, 2023, with the implementation of interim rates in
15 this case. MERC proposes to recover Mapping Project costs only through base
16 rates effective with interim rates.

17
18 Q. WHAT BENEFITS DO THE MAPPING PROJECT PROVIDE TO CUSTOMERS?

19 A. Benefits of the Mapping Project include the following:

20 1. Completion of the Mapping Project is necessary to address the current
21 data gap on MERC's system to allow the Company to identify and track
22 risks, and to help prevent third-party damage from excavation activities.

23 Currently, third party damage represents a significant risk within MERC's

1 DIMP. This project is necessary to enable MERC to locate service lines
2 and mains through its GIS. Inclusion of facilities within the GIS results in a
3 significantly higher probability that those facilities will be properly identified
4 during a locate request. This project is an important step toward reducing
5 third party damage to service lines.

- 6 2. The Mapping Project is intended to compile available information and to
7 allow the Company to identify additional information necessary to
8 understand and address risks on the Company's system.
- 9 3. Technicians in the field will be able to use this information to identify
10 known materials and the location of underground facilities, thereby
11 completing their work more efficiently and effectively.
- 12 4. As missing information is added, the data can be queried to help identify
13 materials when a known material deficiency issue is identified. This will
14 help MERC identify what service lines/meter sets contain the identified
15 material or component that may be subject to recall or accelerated
16 replacement.
- 17 5. Data will aid in determining the budget and safety impact of replacing/not
18 replacing certain components (aid in the budgetary process and risk
19 analysis).
- 20 6. The Mapping Project will bring MERC in line with most of the other WEC
21 companies in terms of data to support service line attributes and locations,
22 etc.

1 7. The Mapping Project will help MERC address compliance with PHMSA
2 regulations, as I discussed above.

3
4 **III. FARM TAP REPLACEMENT PROJECT UPDATE**

5 Q. WHAT ARE FARM TAPS?

6 A. A farm tap is a rural customer-owned direct connection into Northern Natural
7 Gas's ("NNG's") interstate pipeline. When NNG was expanding its pipeline
8 system across Minnesota and its neighboring states, in return for easements,
9 NNG allowed rural landowners to tap directly into the transmission pipeline. As
10 of 2019, MERC had approximately 1,686 active farm tap customers throughout
11 the state. Generally, MERC owns no assets at these taps. NNG owns the meter
12 and the customer owns and maintains the piping from the outlet of the meter to
13 the end use building or facility.

14
15 Since 1987, MERC or its predecessors have been providing certain services to
16 the farm tap customers pursuant to a contract with NNG, and these customers
17 have been paying MERC's distribution rates for many years.

18
19 Q. WHAT IS THE STATUS OF MERC'S FARM TAP PROCEEDING PENDING
20 BEFORE THE COMMISSION?

21 A. On May 19, 2017, MERC filed a petition for approval of a capital plan to replace
22 customer-owned fuel lines located between the interstate pipeline tap and the
23 customers' premises (*i.e.*, farm taps) with utility-owned service lines to address

1 significant safety concerns related to the existing, non-locatable farm tap
2 customer-owned fuel lines (referred to as the “Farm Tap Project”).⁵ MERC
3 proposed a two-step regulatory approval process for the Farm Tap Project: 1)
4 approval to proceed with an initial scoping phase to complete engineering
5 planning and design work and authorization for deferred accounting for costs
6 incurred; and 2) approval of MERC’s proposed procedural schedule and
7 customer communications plan for the associated regulatory process. On
8 November 30, 2017, the Commission issued an Order Approving Phase 1 of
9 Farm Tap Replacement Project with Conditions, approving MERC’s proposed
10 planning and design phase and requiring MERC to evaluate additional
11 alternatives to the proposed replacement project and alternatives for the recovery
12 of associated costs.⁶ The Commission also required that MERC provide a
13 detailed procedural proposal for Phase 2 of the Farm Tap Project and approved
14 MERC’s request for deferred accounting of the costs to conduct the initial
15 planning and design phase of the proposed farm-tap project, estimated at \$2.3
16 million.

17
18 On December 30, 2019, MERC filed its Report on Farm Tap Planning and
19 Design Phase and Phase II Procedural Proposal, in which it proposed scaling

⁵ *In the Matter of a Petition of Minn. Energy Res. Corp. for Approval of Farm Tap Customer-Owned Fuel Line Replacement Plan, Tariff Amendments, and Deferred Acct.*, Docket No. G011/M-17-409, Initial Filing (May 19, 2017).

⁶ *In the Matter of a Petition by Minn. Energy Res. Corp. for Approval of Farm Tap Customer-Owned Fuel Line Replacement Plan, Tariff Amendments, and Deferred Accounting*, Docket No. G011/M-17-409, Order Approving Phase 1 of Farm Tap Replacement Project with Conditions at 11 (Nov. 30, 2017).

1 back its initial replacement of existing customer-owned fuel lines with utility-
2 owned main and service lines by limiting replacements to farm taps located
3 within one mile of MERC's existing distribution system.⁷ The Commission issued
4 an Order Approving Phase II of Farm Tap Replacement with Conditions on
5 October 6, 2021, approving MERC's proposal to extend its distribution system to
6 farm-tap customers located within one mile of MERC's existing distribution
7 system and approving extension of MERC's distribution system to farm tap
8 customers located more than one-mile from MERC's existing distribution system
9 under certain circumstances.⁸ The Commission also approved the Company's
10 proposal to invest an additional \$250,000 each year to implement an enhanced
11 education program designed to inform farm tap customers about the risks
12 associated with farm taps and to encourage farm tap customers to monitor their
13 systems to ensure safety.

14

15 Q. WHAT IS THE STATUS OF THE FARM TAP PROJECT?

16 A. The Company completed Phase I of the Farm Tap Project in 2019 and Phase II
17 of the Farm Tap Project was approved in 2021. MERC submitted a revised
18 schedule on November 18, 2021 and provided notices to customers of the Farm
19 Tap Project and held public meetings in early 2022. The Company held five

⁷ *In the Matter of a Petition by the Minn. Energy Res. Corp. for Approval of Farm Tap Customer-Owned Fuel Line Replacement Plan, Tariff Amendments, and Deferred Acct.*, Docket No. G011/M-17-409, Report on Farm Tap Planning and Design Phase II Procedural Proposal at 12 (Dec. 30, 2019).

⁸ *In the Matter of a Petition by the Minn. Energy Res. Corp. for Approval of Farm Tap Customer-Owned Fuel Line Replacement Plan, Tariff Amendments, and Deferred Acct.*, Docket No. G011/M-17-409, Order Approving Phase II of Farm Tap Replacement with Conditions at 13 (Oct. 6, 2021).

1 public meetings in March of 2022 and filed a summary of comments received on
 2 April 29, 2022, in Docket No. G011/M-17-409.

3
 4 Q. WHAT COSTS HAS MERC INCURRED TO DATE WITH RESPECT TO THE
 5 FARM TAP PROJECT?

6 A. On November 30, 2017, the Commission issued an Order Approving Phase 1 of
 7 Farm Tap Replacement Project with Conditions, approving MERC's proposed
 8 planning and design phase and approving MERC's request for deferred
 9 accounting of the costs to conduct the initial planning and design phase of the
 10 proposed Farm Tap Project, estimated at \$2.3 million. On October 6, 2021, the
 11 Commission approved Phase II of the Farm Tap Project, along with MERC's
 12 proposal to invest an additional \$250,000 each year to implement an enhanced
 13 education program designed to inform farm tap customers about the risks
 14 associated with farm taps and to encourage customers to monitor their systems
 15 to ensure safety, and authorized deferred accounting of Phase II costs.

16
 17 Through July 2022, MERC has incurred the following costs related to the
 18 approved Farm Tap Project work:

19 **Table 3. Farm Tap Project Costs Through July 2022**

Year	External Legal Fees	Agency Fees	Customer Notices	External Firms	MERC Filing Preparation and Docket Administration	Total
2017	\$212,314.47	\$6,781.49				\$219,095.96
2018	\$59,924.40	\$38,019.10	\$8,503.10	\$240,690.57 ⁹	\$34,755.31	\$381,892.78
2019	\$47,656.65	\$1,844.16	\$422.00		\$25,878.31	\$75,801.12

⁹ External – Engineering; scoping and design work.

Year	External Legal Fees	Agency Fees	Customer Notices	External Firms	MERC Filing Preparation and Docket Administration	Total
2020	\$4,783.65	\$4,133.96	\$462.00		\$5,434.63	\$14,814.24
2021	\$9,432.00	\$23,164.35	\$342.00		\$5,902.15	\$38,840.50
2022 (through July)	\$162.00	\$27,499.92	\$70,617.70	\$20,982.13 ¹⁰	\$1,517.60	\$120,779.35
Total	\$334,273.17	\$101,442.98	\$80,346.80	\$261,672.70	\$73,488.00	\$851,223.95

1

2 Q. WHAT COSTS IS THE COMPANY FORECASTING IN 2023 RELATED TO THE
3 FARM TAP PROJECT?

4 A. MERC has forecasted the following costs related to the Farm Tap Project in
5 2023: (1) \$2.0 million of incremental capital costs for the extension of MERC’s
6 distribution system in 2023 to begin extending service to farm tap customers
7 located within one mile of the existing distribution system¹¹ and (2) 2023 costs of
8 \$250,000 related to the enhanced customer safety education program.

9

10 Q. WHAT FARM TAP PROJECT COSTS IS THE COMPANY REQUESTING TO
11 RECOVER IN THIS PROCEEDING?

12 A. In this proceeding, MERC is proposing to recover the following:
13 1) Costs incurred through July 2022, which were authorized to be deferred for
14 future recovery, as reflected in Table 3 above;
15 2) \$250,000 of annual operations and management (“O&M”) expense related to the
16 approved enhanced customer safety education program; and

¹⁰ External – Communications; coordination of public meetings and response to customer inquiries.
¹¹ As discussed in Docket No. G011/M-17-409, Phase II of the Farm Tap Project is a multi-year effort which MERC anticipates undertaking over approximately the next five years, at which time the Company will provide a report to the Commission with recommendations for next steps.

1 3) Capital additions to rate base forecasted to be completed through the test year
2 2023 related to the Farm Tap Project, excluding any contingency.

3
4 Q. WHAT ARE MERC'S FORECASTED COSTS TO COMPLETE PHASE II OF
5 THE FARM TAP PROJECT?

6 A. As detailed in the Company's Phase II Farm Tap Project proposal in Docket No.
7 G011/M-17-409, MERC forecasted that extension of the Company's distribution
8 system to the approximately 210 farm tap customers receiving service within one
9 mile of MERC's existing facilities would cost approximately \$7.1 million, including
10 main, services, meters, labor, and contingency costs.

11
12 Actual Phase II Farm Tap Project costs will depend on the number of farm tap
13 customers located within one mile who agree to have their farm tap replaced and
14 the number of customers outside the 1 mile boundary who qualify under the
15 parameters set forth in the Commission's October 6, 2021 Order and request to
16 have MERC's system extended to serve them. As discussed in Docket No.
17 G011/M-17-409, MERC anticipates implementing Phase II of the Farm Tap
18 Project over five years. MERC will continue to defer costs beyond the 2023 test
19 year to be recovered in a future rate case or rider proceeding.

20

1 Q. HAS MERC ALREADY RECOVERED ANY OF ITS COSTS ASSOCIATED WITH
2 THE FARM TAP PROJECT?

3 A. No. MERC has not recovered any costs associated with either Phase I or Phase
4 II of the Farm Tap Project through base rates, riders, or any other recovery
5 mechanism. The Company proposed to begin recovering Farm Tap Project
6 costs in its 2023 GUIC rider filed in Docket No. G011/M-22-127; however, with
7 the filing of this 2023 test year rate case, MERC has incorporated planned capital
8 investments into base rates.

9

10 IV. ROCHESTER PROJECT UPDATE

11 Q. WHAT IS MERC'S ROCHESTER PROJECT?

12 A. The Rochester Project is an expansion of the transportation capacity and
13 reinforcement of MERC's distribution system in and near the City of Rochester,
14 Minnesota. The Commission approved the Rochester Project under the natural
15 gas extension project ("NGEP") statute by Order Approving Rochester Project
16 and Granting Rider Recovery with Conditions dated May 5, 2017, in Docket No.
17 G011/M-15-895.¹² The Commission also granted MERC a route permit to
18 construct the 13-mile distribution pipeline, southwest of the City of Rochester in
19 Docket No. G011/GP-15-858.¹³

¹² *In the Matter of a Petition by Minnesota Energy Resources Corporation for Evaluation and Approval of Rider Recovery for its Rochester Natural Gas Extension Project*, Docket No. G011/M-15-895, Order Approving Rochester Project and Granting Rider Recovery with Conditions (May 5, 2017).

¹³ *In the Matter of the Application of Minnesota Energy Resources Corporation for a Route Permit for the Rochester Natural Gas Pipeline Project in Olmsted County*, Docket No. G011/GP-15-858, Order Issuing Route Permit (May 5, 2017).

18
19
20

In 2015, the Company finished the Phase I improvements to its distribution system in Rochester.¹⁴ The Commission authorized recovery of MERC’s Phase I improvements of approximately \$5.6 million in the Company’s 2016 rate case, Docket No. G011/GR-15-736.

The Phase II portion of the Rochester Project involved the construction of a new 13-mile long high-pressure pipeline that interconnects a rebuilt town border station (“TBS”) with a new TBS and new high-pressure district regulator stations (“DRS”) and the construction of a distribution mainline from the new DRS to the existing TBS Station 1B, which will be retired. This project tied together the northern and southern portions of MERC’s existing high pressure system, allowing MERC to efficiently manage the increased supply of natural gas delivered to its distribution system to meet customer demand.

Q. PLEASE FURTHER DESCRIBE MERC’S ROCHESTER PROJECT.

A. MERC’s Rochester Project involves upgrading Rochester’s high pressure distribution system between TBSs, which receive natural gas from NNG’s high-pressure interstate pipeline system and transmits it at a reduced pressure for delivery to MERC’s distribution system. To upgrade this system, MERC is

¹⁴ Phase I of the Rochester Project included modernizing, standardizing, and interconnecting portions of MERC’s district regulator stations and piping within the City of Rochester to more efficiently and effectively balance the flow of natural gas on this low-pressure distribution system and prepare the system for Phase II work.

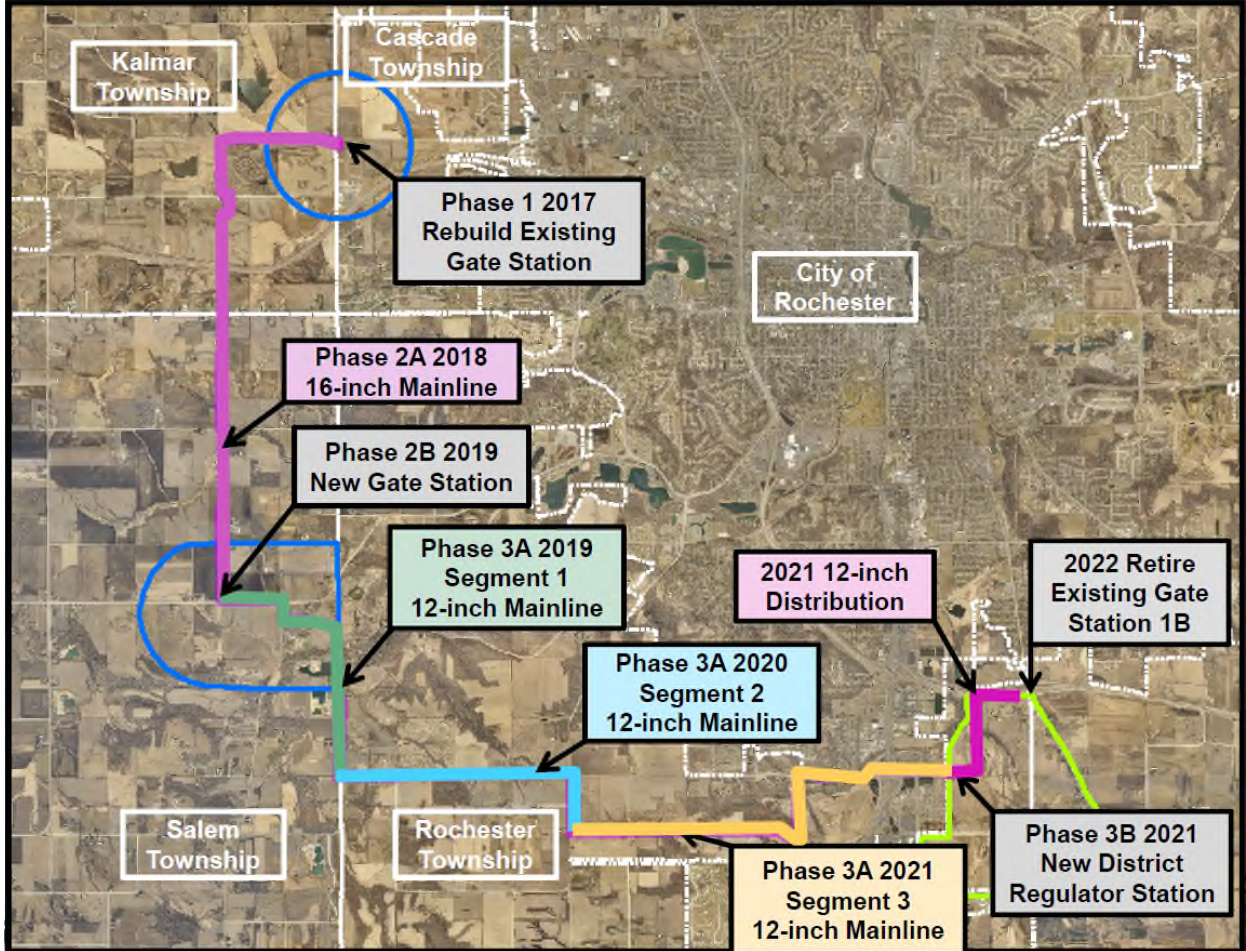

1 installing three new stations and 13.8 miles of distribution piping. Figure 1 below
2 shows the location of MERC's approved route, TBSs and buffers, and DRS and
3 buffer.

4

5

6

**Figure 1. Approved Rochester Route,
Town Border Stations, and District Regulator Station**

7

8

9 Q. WHAT IS THE STATUS AND TIMELINE OF MERC'S ROCHESTER PROJECT?

10 A. There were two main components for the Rochester Project: (1) NNG's upgrades
11 to the transmission system serving southeastern Minnesota and (2) MERC's
12 upgrades to its distribution system in and around Rochester.

1
2
3
4
5
6

10
11
12
13

Under a new 25-year contract, NNG has upgraded the interstate pipeline system serving Rochester and southeastern Minnesota in order to provide MERC with additional firm interstate pipeline capacity to the southeastern region. The first tranche of additional capacity became available effective November 1, 2018 and the second tranche became available effective November 1, 2019. In total, the NNG upgrades resulted in 53,032 dekatherms (“Dth”)/day of incremental capacity.

The upgrades to MERC’s distribution system have been constructed in phases and are planned to be completed in 2022, as shown in Table 4 below.

Table 4. Rochester Project Phases

Phase	Description	Status
1	Rebuild of TBS #1D	Completed and placed in service December 2017
2A	Construction of approximately 5 miles of 16-inch mainline piping from TBS #1D to TBS #2	Completed and placed in service November 2018
2B	Construction of new TBS #2	Completed and placed in service November 2019
3A	Construction of approximately 9 miles of 12-inch mainline piping, completed in 3 segments	Completed and placed in service October 2021
3B	Construction of new DRS #90 and approximately 1.3 miles of 12-inch mainline piping from the new DRS #90 to connect to MERC’s distribution system at the to-be-retired station 1B	Completed and placed in service November 2021 and October 2021, respectively
Final	Retire Station #1B, complete restoration work	In process—to be retired by end of 2022

14

1 Remaining activities, which are expected to be completed in 2022, are primarily
 2 related to the retirement of Station 1B, outstanding payments to landowners, and
 3 continued ongoing restoration efforts.

4
 5 Q. WHAT ARE MERC'S CURRENT COST ESTIMATES TO COMPLETE THE
 6 ROCHESTER PROJECT?

7 A. Table 5 below provides the current Phase II Rochester Project spend by year,
 8 including actual costs incurred from 2014 through July 31, 2022. This does not
 9 include the Phase I project costs previously authorized for recovery in Docket No.
 10 G011/GR-15-736.

11 **Table 5. Actual and Forecasted Rochester Project Costs**

	Station 1D	16-inch Mainline	Rochester #2	12-inch Mainline	Station #90	12in Distribution	Gate 1B Retire	Total by Year
2014	\$ 12,188	\$ 56,436	\$ 17,872	\$ 88,573	\$ 9,996	\$ -	\$ -	\$ 185,066
2015	\$ 33,737	\$ 156,218	\$ 49,472	\$ 245,176	\$ 27,670	\$ -	\$ -	\$ 512,273
2016	\$ 99,386	\$ 460,198	\$ 145,738	\$ 722,258	\$ 81,511	\$ -	\$ -	\$ 1,509,092
2017	\$ 2,248,235	\$ 398,239	\$ 140,614	\$ 641,736	\$ 57,671	\$ -	\$ -	\$ 3,486,495
2018	\$ 282,405	\$ 8,045,086	\$ 170,369	\$ 995,844	\$ 10,010	\$ -	\$ -	\$ 9,503,714
2019	\$ 50,010	\$ 242,639	\$ 3,161,493	\$ 4,484,448	\$ (49,536)	\$ -	\$ -	\$ 7,889,054
2020	\$ 1,107	\$ 34	\$ 48,042	\$ 6,423,290	\$ 31,408	\$ 335,179	\$ -	\$ 6,839,060
2021	\$ 169,009	\$ 410	\$ 10,809	\$ 8,767,573	\$ 1,746,512	\$ 1,009,308	\$ -	\$ 11,703,621
2022	\$ -	\$ 326	\$ (1)	\$ 49,357	\$ 70,471	\$ 5,577	\$ 50,000	\$ 175,730
2023	\$ -	\$ -	\$ -	\$ -	\$ -	\$ -	\$ -	\$ -
TOTALS	\$ 2,896,078	\$ 9,359,586	\$ 3,744,408	\$ 22,418,256	\$ 1,985,713	\$ 1,350,063	\$ 50,000	\$ 41,804,104

12
 13
 14 Actual costs incurred from 2014 through 2016 were primarily for the initial
 15 environmental review, consultant contract, regulatory review, engineering and
 16 design, and route surveys. Construction spending began in earnest in 2017,
 17 including surveys, easement acquisition, and additional engineering and design
 18 work, and was substantially completed in 2022. Remaining closeout activities
 19 include removal of station TBS 1B and restoration of the site, estimated at
 20 \$50,000 and to be completed in late 2022.

Q. WHAT PROJECT COSTS HAS MERC INCURRED TO DATE TO COMPLETE ITS ROCHESTER DISTRIBUTION UPGRADES AND WERE THOSE COSTS PRUDENTLY INCURRED?

A. In Docket No. G011/M-15-895, the Commission determined that “the Rochester Project is necessary, reasonable, and prudent to provide service to MERC’s Rochester service area and its system as a whole.”¹⁵

Through July 31, 2022, MERC has incurred approximately \$41,754,104 for construction and implementation of the Rochester Project. Exhibit ____ (TFP-D), Schedule 1 provides a breakout, by category, of the costs incurred through July 31, 2022. Support for the Company’s annual Rochester Project costs forecasted and incurred and the reasonableness and prudence of those costs have been presented in each of the Company’s annual NGEF Rider filings in Docket Nos. G011/M-18-182, G011/M-19-608, G011/M-20-420, G011/M-21-271, and G011/M-22-195.

Q. WHAT COST RECOVERY HAS THE COMMISSION APPROVED FOR THE ROCHESTER PROJECT?

A. The Commission granted MERC preapproval in Docket No. G011/M-15-895 to recover Rochester Project costs of up to \$44 million through the combination of

¹⁵ *In the Matter of a Petition by Minnesota Energy Resources Corporation for Evaluation and Approval of Rider Recovery for its Rochester Natural Gas Extension Project*, Docket No. G011/M-15-895, Order Approving Rochester Project and Granting Rider Recovery with Conditions at 9 (May 5, 2017).

1 an NGEP rider and base rates, with the understanding that the Company would
2 retain the burden in future rate proceedings to demonstrate that the Rochester
3 Project was implemented reasonably and prudently and to justify any alterations
4 in the cost of the individual items that made up the total \$44 million estimate.¹⁶

5 The Commission also approved MERC's proposal to recover NGEP rider costs
6 from all MERC customers, regardless of location, and granted MERC
7 preapproval to recover the cost of NNG's upgrades through its MERC-NNG
8 Purchased Gas Adjustment ("PGA").¹⁷

9
10 In MERC's 2016 rate case, Docket No. G011/GR-15-736, the Commission
11 approved recovery of Phase I of the Rochester Project (approximately \$5.6
12 million). In that proceeding, the Commission ordered that all Rochester Project
13 Phase II costs be removed from MERC's 2016 rate case and deferred for future
14 rate recovery, which they were.

15
16 In MERC's 2018 rate case, Docket No. G011/GR-17-563, the Commission
17 authorized MERC to recover Phase II Rochester Project costs forecasted for the
18 2018 test year, and required MERC to account for any difference between the
19 2018 actual Rochester Project capital expenditures and MERC's capital
20 estimates used in the 2018 test year rate case as a true-up with MERC's NGEP

¹⁶ *In the Matter of a Petition by Minnesota Energy Resources Corporation for Evaluation and Approval of Rider Recovery for its Rochester Natural Gas Extension Project*, Docket No. G011/M-15-895, Order Approving Rochester Project and Granting Rider Recovery with Conditions at 18 (Order Point 2) (May 5, 2017).

¹⁷ *Id.* at 18 (Order Point 3).

1 rider true-up calculation. MERC accounted for the difference between the
2 amount of Rochester Project costs included in rate base in Docket No. G011/GR-
3 17-563 and the Company's actual Rochester Project rate base additions in 2018
4 in its 2019 NGEF Rider True-up in Docket No. G011/M-20-420.

5
6 Since MERC's 2018 rate case, the Company has made five NGEF Rider filings,
7 including three petitions for approval of its NGEF true-up reconciliations.¹⁸ The
8 NGEF Rider has allowed MERC to recover a portion of its annual depreciation
9 expense, property tax expense, and return on capital investment each year.

10
11 In its June 18, 2019 Order in Docket No. G011/M-18-182, the Commission
12 approved MERC's first annual request for NGEF Rider recovery to allow the
13 Company to recover a portion of its forecasted 2019 revenue deficiency for the
14 Rochester Project. The Commission determined the 33% limitation in the NGEF
15 Statute applied to the annual incremental revenue requirement or revenue
16 deficiency rather than to the total project costs.

17
18 In its September 21, 2020 Order in Docket No. G011/M-19-608, the Commission
19 approved MERC's forecasted 2020 NGEF rider adjusted to include a rate base
20 offset for property taxes. In its July 15, 2021 Order in Docket No. G011/M-20-
21 420, the Commission approved MERC's forecasted 2021 NGEF rider recovery

¹⁸ These filings are reflected in Docket Nos. G011/M-18-182, G011/M-19-608, G011/M-20-420, G011/M-21-271, and G011/M-22-195.

1 and 2019 rider true-up. As of October 2022, MERC's 2022 NGEF rider and 2020
2 NGEF true-up were pending in Docket No. G011/M-21-271, with the Minnesota
3 Department of Commerce (the "Department") and the Company in agreement
4 regarding the 2022 NGEF rider and 2020 true-up. MERC's 2023 NGEF rider
5 and 2021 true-up were approved by Order dated July 20, 2022 in Docket No. 22-
6 195, for implementation effective January 1, 2023. However, as discussed by
7 Mr. Zgonc in his Direct Testimony, with this 2023 test year rate case filing, MERC
8 is incorporating the Rochester Project costs into base rates effective with interim
9 rates and is proposing to set the NGEF rider surcharge rates to \$0.0000 effective
10 January 1, 2023.

11
12 Finally, MERC's capacity payments to NNG are being recovered through the
13 commodity portion of the PGA, as approved in Docket Nos. G011/M-18-526 and
14 G011/M-19-496.

15
16 Q. WHAT ROCHESTER PROJECT COSTS IS MERC REQUESTING TO
17 RECOVER IN THIS PROCEEDING?

18 A. Now that the Rochester Project is fully in service and all remaining project
19 phases and project costs are forecasted to be incurred and completed in 2022,
20 MERC is proposing to include the Phase II Rochester Project in rate base in this
21 case. Additional details regarding the roll in of the NGEF rider to test year rate
22 base are discussed by Mr. Zgonc.

1 Q. DOES MERC CURRENTLY HAVE AN NGEF RIDER IN PLACE TO RECOVER
2 ITS ROCHESTER COSTS?

3 A. Yes. MERC received approval to proceed with the Rochester Project in 2017
4 and at that time the Commission determined that the Rochester Project was
5 eligible for rider recovery. Since then, MERC has made five NGEF Rider filings,
6 including three petitions for approval of its NGEF true-up reconciliations.¹⁹ As
7 discussed above, MERC is proposing set the NGEF Rider surcharge rates to
8 \$0.0000 effective January 1, 2023, with the implementation of interim rates in this
9 case.

10
11 Q. DID THE COMMISSION'S APPROVAL OF THE ROCHESTER PROJECT
12 IMPOSE SPECIFIC REQUIREMENTS ON MERC REGARDING MITIGATION
13 OF COSTS?

14 A. Yes. The Commission imposed requirements for MERC to explore cost
15 mitigation related to the additional capacity MERC will hold as a result of the
16 Rochester Project. Specifically, to help mitigate capacity costs for sales
17 customers, the Commission required MERC to (1) divert excess capacity to its
18 other markets to avoid having to purchase more expensive capacity to serve
19 these markets and (2) make every effort to obtain the best available terms for
20 long-term and short-term release of excess capacity.

21

¹⁹ As referenced above, these filings are reflected in Docket Nos. G011/M-18-182, G011/M-19-608, G011/M-20-420, G011/M-21-271, and G011/M-22-195.

1 With regards to the latter requirement, the Commission required MERC to file a
2 plan describing how the Company will mitigate costs for sales customers,
3 including but not limited to a detailed plan for maximizing the value received for
4 capacity released into the secondary market, and to report on its efforts in annual
5 NGEF-rider filings. MERC filed its Capacity Release Plan in Docket No.
6 G011/M-15-895 on August 31, 2017, which was approved by the Commission by
7 Order dated May 8, 2018. Consistent with the Commission's Order, the
8 Company has continued to file semiannual updates regarding its capacity-
9 release-related activity in Docket No. G011/M-15-895. MERC also reports on
10 Rochester capacity releases in its Annual Automatic Adjustment ("AAA") reports.

11
12 Regarding the diversion of capacity to other points on MERC's system, as
13 mentioned above, the incremental NNG capacity became available to MERC at
14 the Rochester TBSs in November 2018 and November 2019. In accordance with
15 the Commission's May 8, 2018 Order in Docket No. G011/M-15-895, MERC has
16 included information on capacity substitutions in each of its annual demand
17 entitlement filings. The additional capacity has allowed MERC to move capacity
18 for utilization at other non-constrained gates on MERC's system and avoid the
19 purchase of additional capacity at these stations, which mitigates the capacity
20 costs for MERC's sales customers. MERC utilizes best efforts to maximize the
21 capacity available to it under the NNG contract on a system-wide basis to avoid
22 future capacity purchases and continues to report its capacity utilization in its
23 annual Demand Entitlement filings.

17
18
19
20
21
22

Q. IS MERC PROPOSING ANY MODIFICATIONS TO THE REQUIRED FILINGS RELATED TO THE ROCHESTER PROJECT IN THIS PROCEEDING?

A. Yes, MERC requests approval to terminate the continued semiannual reporting in Docket No. G011/M-15-895. MERC has been submitting semiannual reports in Docket No. G011/M-15-895 in accordance with the Commission’s May 8, 2018 Order since August, 2018. Since that time, the Company has continued to release capacity consistent with its approved capacity release plan. As no action has been taken on the semiannual reports, and considering similar capacity release information is reported in the Company’s AAA reports, MERC requests to suspend continued semiannual reporting in Docket No. G011/M-15-895.

V. WORTHINGTON LATERAL PROJECT

Q. WHAT IS MERC’S WORTHINGTON LATERAL PROJECT?

A. The Worthington Lateral Project (the “Worthington Project”) was undertaken to increase the natural gas capacity to MERC’s distribution system in the Worthington, Minnesota area. The Worthington Project consisted of running a 12-inch high-pressure steel main from NNG’s existing Brewster TBS, located approximately six miles west of Worthington, back to Worthington. To accommodate the additional capacity to be delivered, NNG also rebuilt its Brewster TBS and abandoned its Worthington TBS on Worthington’s west side. MERC constructed a new DRS (DRS #11) at the end of the new 12-inch main to

1 reduce pressure to 70 psig for delivery of natural gas to the Worthington
2 distribution system.

3

4 Q. WHEN DID MERC COMPLETE THE WORTHINGTON PROJECT?

5 A. MERC began construction on the Worthington Project in 2019 and completed the
6 project in 2020. The new DRS #11 was placed in service in 2020.

7

8 Q. WHY DID MERC UNDERTAKE THE WORTHINGTON PROJECT?

9 A. Prior to undertaking the Worthington Project, firm service provided by NNG at the
10 Worthington TBS on the west side of Worthington was approximately 416 Dth per
11 day short of MERC's peak day firm service demand. NNG did not have capacity
12 on its lateral into Worthington to provide the necessary incremental capacity
13 increase. By having NNG relocate the old Worthington TBS upstream to
14 Brewster on NNG's lateral, NNG was able to provide an additional 980 Dth per
15 day of firm service, providing MERC with the necessary service to cover peak
16 day demand, and a margin for growth. MERC then constructed its own pipeline
17 to interconnect to the new TBS in order to provide the additional capacity to meet
18 customer requirements in Worthington.

19

1 Q. WHAT COSTS RELATED TO THE WORTHINGTON PROJECT IS MERC
2 PROPOSING TO INCLUDE IN THIS CASE?

3 A. MERC incurred capital costs of \$12,734,602 related to the Worthington Project
4 and has included that project in current rate base balances in this case for the
5 2023 test year.

6

7 **VI. SEWER CROSS BORE SURVEY PROJECT**

8 Q. WHAT IS MERC'S SEWER CROSS BORE PROJECT?

9 A. MERC has developed and implemented safety plans to reduce the risk to
10 customers and minimize the threat of sewer cross bores, which occur where a
11 natural gas line is installed through a sewer line using trenchless technology.
12 Sewer cross bores pose a risk of gas distribution lines being unintentionally
13 punctured by sewer cleaning contractors.²⁰

14

15 With the help of a third-party contractor, MERC has been inspecting sewer
16 laterals and mains and identifying whether there is a need to repair or replace
17 damaged natural gas pipelines as a result of sewer cross bores. PHMSA's Gas
18 Distribution Pipeline Integrity Management Enforcement Guidance notes that:

19 Cross bores of gas lines in sewers have been reported at 2-3
20 per mile in high risk areas – predominately where trenchless
21 installation methods were used for gas line installs and where
22 sewers and gas lines are in proximity of each other. As such,

²⁰ There have been a number of instances where such damage occurred and in some cases, the gas ignited, resulting in injury and property damage. See MNOPS Alert to Natural Gas Pipeline Operators (May 10, 2010) available at <https://dps.mn.gov/divisions/ops/forms-documents/Documents/Alert%20Notice%2001-2010.pdf>.

1 operators must determine the potential for cross bore of
2 sewers resulting in gas lines intersecting with sewers.²¹
3

4 MERC intends to continue the sewer cross bore survey work and to expand the
5 scope of annual surveys to be completed beginning in 2023 in order to complete
6 these surveys more quickly and identify potentially dangerous cross bores.

7 Additional support for the need to undertake these surveys has been provided in
8 the Company's GUIC Rider filings.

9

10 Q. HAS THE COMMISSION APPROVED ANY SPENDING RELATED TO THE
11 SEWER CROSS BORE PROJECT IN THE PAST?

12 A. Yes, the Commission approved \$1 million in annual spending for the Sewer
13 Cross Bore Project in MERC's GUIC Rider filings.²²
14

15 Q. WHAT IS THE PROJECTED SCOPE OF THE SEWER CROSS BORE
16 INSPECTION PROJECT GOING FORWARD?

17 A. MERC plans to continue and expand the scope of this initiative in 2023 and
18 beyond. Continuing these inspections is important for the safety of MERC's
19 customers, as gas lines in sewer lines represent an immediate hazard. As
20 discussed in the Direct Testimony of Mr. Zgonc, MERC has proposed to increase
21 annual spending for the Sewer Cross Bore Project in 2023 and beyond to allow

²¹ PHMSA, Gas Distribution Integrity Management Program: FAQs, *available at*
<https://primis.phmsa.dot.gov/dimp/faqs.htm>.

²² These filings are contained in Docket Nos. G011/M-18-281, G011/M-19-282, G011/M-20-405, and G011/M-21-232, respectively.

1 for an increased number of surveys to be conducted each year in order to more
2 quickly identify and remediate cross bores across the communities MERC
3 serves. In particular, MERC proposes to increase annual spending for the Sewer
4 Cross Bore Project to \$1.75 million per year beginning in 2023. This increased
5 annual spending will allow MERC to complete these surveys more quickly and to
6 mitigate any identified cross bores more quickly as a result, reducing risks on the
7 distribution system.

8
9 In developing the Sewer Cross Bore Project, the Company has developed
10 phases of the project based on the assessment of a variety of risk factors,
11 including: (1) high occupancy facilities where occupants have limited mobility,
12 which may cause a significant delay in evacuation efforts should an incident
13 occur (e.g., hospitals and nursing homes); (2) past cross bore activity; (3) high
14 occupancy facilities where the occupants generally are able to quickly evacuate
15 (e.g., schools, churches, and daycares); and (4) pipe vintage. MERC's cross
16 bore surveys completed to date have focused on plastic pipe installed between
17 September 1, 2000, to September 1, 2010, and the gas facilities of high
18 occupancy areas, including schools, churches, daycares, apartment complexes,
19 hospitals, and nursing homes.

20

1 Q. HOW MANY INSPECTIONS DOES MERC ANTICIPATE COMPLETING UNDER
2 THE EXPANDED PROJECT SCOPE?

3 A. The total number of inspections that can be completed each year under the
4 proposed expanded project scope will depend on the annual costs for third-party
5 contractor inspections, the geographic areas where inspections are planned to
6 be completed, and the percentage of inspections requiring a push camera.²³ The
7 per inspection cost has increased in recent years due to a number of factors
8 including current fuel costs, labor shortages resulting in higher labor costs, and
9 the impacts of inflation. These factors have impacted the cost per survey in
10 2022, which increased from \$75 to \$100 per survey in 2021 to approximately
11 \$140 to \$155 per survey in 2022.²⁴ The camera inspections, which require
12 specialized equipment, and some administrative aspects of the Sewer Cross
13 Bore Project will continue to be completed by third party contractors.

14
15 Q. WHAT COSTS RELATED TO THE SEWER CROSS BORE PROJECT IS MERC
16 PROPOSING TO RECOVER THIS CASE?

17 A. Given the increased scope of the Sewer Cross Bore Project going forward,
18 MERC proposes annual spending for the Sewer Cross Bore Project of \$1.75
19 million beginning in 2023.

20

²³ In some cases, the contractor is not able to clear the sewer through the use of a lateral launch and a push camera or rodding is required to verify the sewer is clear.

²⁴ Depending on whether the survey can be conducted via lateral launch or requires push camera.

1 **VII. PRAGMA CAD MOBILE WORKFORCE MANAGEMENT**

2 Q. WHAT IS THE PRAGMA CAD MOBILE WORKFORCE MANAGEMENT
3 PROJECT?

4 A. CGI PragmaCAD (“PCAD”)²⁵ is a workforce management system being
5 implemented to replace MERC’s previous workforce management system known
6 as G4/MobileField. The product is used to distribute and transmit orders to Field
7 Technicians for completion and follow up. Fieldwork is grouped and sequenced
8 into comprehensive work plans that address service work requiring multiple types
9 of operations. By appropriately sequencing work, MERC is able to ensure that
10 work that must be completed first is done before subsequent and dependent
11 work begins.

12
13 Q. WHEN DOES MERC PLAN TO HAVE PCAD IMPLEMENTED?

14 A. MERC plans to deploy PCAD in two phases in 2023 with initial roll out at the end
15 of March 2023 and additional enhancements scheduled for August 2023. The
16 enhancements to be implemented in August will allow for additional electronic
17 data entry during field site visits.

18
19 Q. WHAT IS THE COST OF THE PCAD PROJECT IN THIS CASE?

20 A. Through 2023, the forecasted capital costs related to the PCAD project for
21 MERC are approximately \$5 million.

22

²⁵ PCAD is the product name for an electronic dispatch suite of software.

1 Q. WHY IS PCAD BEING IMPLEMENTED IN PLACE OF THE CURRENT
2 DISPATCH SYSTEM?

3 A. The current dispatch software in use, G4/MobileField, is no longer supported by
4 the manufacturer and was a standalone product used only by WEC's affiliates
5 operating in Minnesota and Michigan. Continuing to use G4/MobileField would
6 have required MERC to implement the new version of that software because
7 what is currently being used is no longer supported. Implementing PCAD will put
8 MERC on the same platform as affiliates in other states, providing greater
9 support. MERC's implementation of PCAD is part of MERC's larger efforts to
10 standardize its software platforms and increase security.

11
12 Q. WHAT BENEFITS DOES PCAD PROVIDE?

13 A. The largest benefit comes from the standardization. PCAD is a current software
14 with current support of its provider. Along with the software, MERC also benefit
15 from the existing internal support team. PCAD also offers enhanced scheduling
16 and routing for field technicians.

17

1 **VIII. SERVICE AND MAIN EXTENSIONS**

2 Q. IN ITS ORDER TERMINATING INVESTIGATION AND CLOSING DOCKET IN
3 DOCKET 90-563, THE COMMISSION DIRECTED EACH GAS UTILITY TO
4 ADDRESS SIX QUESTIONS IN FUTURE RATE CASES RELATING TO THE
5 COMPANIES' EXTENSION RULES AND POLICIES. DOES YOUR
6 TESTIMONY ADDRESS THE COMMISSION'S QUESTIONS?

7 A. Yes, I will address each of the Commission's questions individually below.

8
9 Q. COMMISSION QUESTION NUMBER ONE: "SHOULD THE 'FREE' FOOTAGE
10 OR SERVICE EXTENSION ALLOWANCE INCLUDE THE MAJORITY OF ALL
11 NEW EXTENSIONS WITH ONLY THE EXTREMELY LONG EXTENSIONS
12 REQUIRING A [CIAC]?"

13 A. Yes. Customers, as a general policy, should receive some length of line
14 extension at no incremental charge to the individual customer, and the
15 Company's current tariff allows the majority of new residential customers to be
16 served from existing main to receive service without a CIAC. For all residential
17 services, MERC's tariff provides 75 feet of service line from the customer's
18 property line without requiring a CIAC. This policy benefits new customers
19 without unduly burdening existing customers by improving access to natural gas
20 service for new customers and ensuring consistent treatment with the services
21 provided to existing customers. The addition of new customers also allows
22 common costs to be shared across a larger base of customers.

23

1 Under the Company's extension tariffs, customers requiring atypical new
2 services—such as those requiring more than 75 feet of service line—bear the
3 added cost of these services.

4

5 Q. COMMISSION QUESTION NUMBER TWO: "HOW SHOULD THE LDC [LOCAL
6 DISTRIBUTION COMPANY] DETERMINE THE ECONOMIC FEASIBILITY OF
7 SERVICE EXTENSION PROJECTS AND WHETHER THE EXCESS FOOTAGE
8 CHARGES ARE COLLECTED?"

9 A. An economic feasibility study should be completed for all new customers
10 applying for natural gas service where a current main does not exist. The
11 feasibility model should provide for connection without a CIAC when the
12 revenues expected to be generated from the customers served by the project
13 exceed the costs associated with the extension.

14

15 The feasibility model does not apply to residential stand-alone service lines. As
16 discussed in response to Commission Question One, above, residential stand-
17 alone service extensions are provided 75 feet of service line without a CIAC, with
18 any extension beyond 75 feet requiring a CIAC based on the incremental cost of
19 additional footage.

20

21 For all other service extensions, MERC has developed a Commission-approved
22 Customer Extension Model which is used to review all new extension projects.
23 The Commission approved the Company's customer extension model in Docket

1 No. G011/M-15-165, and the Company implemented the approved model in July
2 2015. The Company's extension tariff appropriately addresses the concern that
3 existing customers should not subsidize growth, and the model only allows for a
4 sharing of costs if existing customers benefit from the extension. If the new line
5 extension is not a net revenue generator over the life of the facilities, the
6 Company recovers the deficiency from the new customer(s) through a CIAC.

7
8 Q. COMMISSION QUESTION NUMBER THREE: "SHOULD THE LDC'S SERVICE
9 EXTENSION POLICY BE TARIFFED IN NUMBER OF FEET WITHOUT
10 CONSIDERATION TO VARYING CONSTRUCTION COSTS AMONG
11 PROJECTS OR SHOULD THE ALLOWANCE BE TARIFFED AS A TOTAL
12 DOLLAR AMOUNT PER CUSTOMER?"

13 A. Due to the varying construction costs across the State of Minnesota caused by
14 geographic area, type of soil, size of lot, amount of gas used, etc., it would be
15 difficult to develop a "one size fits all" construction cost policy that is equitable to
16 all customers. However, the designated footage allowance fits most residential
17 customers' needs and is relatively easy to apply and monitor. In addition, if
18 abnormal conditions such as rock make it impractical to install a gas service line
19 and satisfy all safety requirements, the Company may refuse to install a gas
20 service line to the premises. If abnormal conditions exist and it is possible to
21 install a gas service line by special design or extra construction, and such gas
22 service line can be installed safely, the Company may design and install the gas

1 service line to suit the particular circumstances, provided the following conditions
2 are met:

3 (a) The design, arrangement, and location of the gas service line are
4 accepted and approved by the applicant; and

5
6 (b) The applicant agrees to pay the Company for all abnormal construction
7 costs including the cost of casing, if required.

8
9 The Company conducts a feasibility study to determine abnormal construction
10 costs. The Company believes that such an approach appropriately places the
11 costs of abnormal construction on the customer seeking service in those
12 circumstances.

13

14 Q. COMMISSION QUESTION NUMBER FOUR: "IS THE LDC'S EXTENSION
15 CHARGE REFUND POLICY APPROPRIATE?"

16 A. MERC does not offer a refundable contract in its normal course of business.
17 MERC completes an economic feasibility study for the project and bases
18 revenues on the projected customer connections planned over time. Using that
19 information and input from Company personnel, MERC determines
20 reasonableness for the number of customer connects by year and incorporates
21 this data into the model. Any gap for the non-feasible portion of the project is
22 collected from the developer or customer as a non-refundable CIAC prior to the
23 installation.

24

1 MERC believes the Company's policy is appropriate because it shares the
2 responsibility between the developer or customer and the Company. The
3 developer or customer benefits by providing the best information about the site
4 being developed to get the best design estimate, which is used to determine the
5 required CIAC. The Company and existing customers benefit by having a
6 detailed design with the best information known at the time, a CIAC that is
7 collected up front, and fixed charges that are spread over a larger customer
8 base.

9
10 Q. COMMISSION QUESTION NUMBER FIVE: "SHOULD CUSTOMERS BE
11 ALLOWED TO RUN THEIR OWN SERVICE LINE FROM THE STREET TO THE
12 HOUSE (OR USE AN INDEPENDENT CONTRACTOR) IF IT WOULD BE LESS
13 EXPENSIVE THAN HAVING THE UTILITY CONSTRUCT THE LINE?"

14 A. No. In order to maintain the integrity of the distribution system and provide for
15 compliance with industry-required "Operator Qualifications," only a utility or its
16 contractors should perform this type of work. Natural gas distribution safety is
17 the primary concern of the Company. Further, PHMSA's regulation of natural
18 gas facilities makes it necessary for the Company to have knowledge of the
19 materials and quality of the systems it operates. PHMSA's DIMP regulations
20 were approved and placed into code in December 2009. In Docket No. PHMSA-
21 RSPA-2004-19854, PHMSA amended the Federal Pipeline Safety Regulations to
22 require operators of gas distribution pipelines to develop and implement integrity

1 management (“IM”) programs. The purpose of these programs is to enhance
2 safety by identifying and reducing pipeline integrity risks.

3
4 As further discussed above, the farm tap customers currently on MERC’s system
5 are taking service through customer-owned piping that runs from the outlet of the
6 natural gas meter to the customer premises. However, the Commission
7 approved, in Docket No. G011/M-17-409, the Company’s proposal to extend its
8 distribution system to farm-tap customers located within one mile of MERC’s
9 existing distribution infrastructure (*i.e.*, Phase II of the Farm Tap Project”). Phase
10 II of the Farm Tap Project will result in the replacement of customer-owned fuel
11 lines with Company-owned and -operated service lines and mains to provide
12 service to farm tap customers located within one mile of the existing distribution
13 system. The Farm Tap Project demonstrates MERC’s commitment to
14 constructing lines (in lieu of customers or independent contractors running their
15 own lines) to prioritize natural gas distribution safety.

16
17 Q. COMMISSION QUESTION NUMBER SIX: “SHOULD THE LDC BE REQUIRED
18 TO OFFER ITS CUSTOMERS FINANCING FOR SERVICE EXTENSION
19 CHARGES? THIS COULD BE OFFERED AS AN ALTERNATIVE TO PAYING
20 EXTENSION CHARGES IN ADVANCE OF CONSTRUCTION.”

21 A. No. The Company does not currently offer a financing option for service
22 extensions and does not believe it should be required to do so. The
23 administrative burden to manage multiple financing projects and the higher cost

1 of interest from MERC to customers makes this a higher cost option for
2 customers.

3

4 Q. IN DOCKET 90-563, THE COMMISSION EXPRESSED THREE SPECIFIC
5 CONCERNS ABOUT THE IMPACT OF SERVICE EXTENSION-RELATED
6 ADDITIONS ON THE COMPANY'S RATE BASE. THE FIRST CONCERN IS
7 WHETHER THE LDCS ARE CORRECTLY AND CONSISTENTLY APPLYING
8 THE EXTENSION TARIFF. PLEASE EXPLAIN WHETHER THE COMPANY
9 HAS CORRECTLY AND CONSISTENTLY APPLIED ITS EXTENSION TARIFF.

10 A. To determine if the Company has correctly and consistently applied the
11 extension tariffs, a study was conducted under my direction which examined the
12 service line and main line extensions from May 2017 through April 2022 (the
13 period since the prior study conducted for our last natural gas rate case, Docket
14 No. G011/GR-17-563), attached as Exhibit __ (TFP-D), Schedule 2 and Exhibit
15 __ (TFP-D), Schedule 3, respectively. MERC's approach was to analyze all main
16 line extension projects and service line extension projects rather than samples of
17 such projects during this time frame. The total number of service extension
18 projects was 13,077, and the total number of main extension projects was 910.

19

1 Q. HOW MANY OF THE MAIN EXTENSION PROJECTS WERE RESIDENTIAL
2 PROJECTS?

3 A. Of the 910 main line extension projects from May 2017 through April 2022, 581
4 were residential projects only, and 41 included both residential and commercial
5 customers. The remaining 288 were commercial main line extension projects.
6

7 Q. HOW MANY OF THE SERVICE LINE EXTENSION PROJECTS WERE
8 RESIDENTIAL PROJECTS?

9 A. Of the 13,077 service line extension projects, 11,771 were residential. The
10 remaining 1,306 service line extension projects were commercial.
11

12 Q. WHAT WERE THE RESULTS OF THE SERVICE LINE EXTENSION REVIEW?

13 A. For each of the service line extension projects, MERC reviewed the service
14 installation documentation and billing records to determine whether the service
15 extension tariff was applied correctly. The result of this review showed that
16 MERC correctly applied its extension tariff with respect to all service extensions
17 and appropriately charged customers for excess footage in accordance with
18 applicable tariff provisions. Exhibit ____ (TFP-D), Schedule 2 both summarizes
19 and details the results of the service line extension review.
20

1 Q. WHAT ARE YOUR OTHER CONCLUSIONS FROM THE SERVICE LINE
2 EXTENSION ANALYSIS?

3 A. For each service line extension project, MERC reviewed design documents,
4 feasibility studies, and installation records. Projects that required CIACs were
5 researched to determine if the CIAC was properly charged and collected.
6

7 The review showed that of the 13,077 service line extension projects:

- 8 1) 67 required a CIAC for a total of \$102,256.50;
9 2) 1,720 required excess footage charges for a total of \$779,200.47; and
10 3) 1,791 required winter construction charges for a total of \$1,555,985.07.
11

12 All of the required CIAC, excess footage, and winter construction charges were
13 collected per the tariff except for two service lines. In both of these instances,
14 MERC did not bill winter construction charges to the customer due to the timing
15 of tariff changes that were approved by the Commission in Docket No. G011/M-
16 20-563.
17

18 Q. CAN YOU PROVIDE ADDITIONAL DETAILS REGARDING THE TWO CASES
19 WHERE WINTER CONSTRUCTION CHARGES WERE NOT APPLIED
20 PURSUANT TO MERC'S COMMISSION APPROVED TARIFF?

21 A. In Docket No. G011/M-20-563, MERC proposed, and the Commission approved,
22 changes to MERC's winter construction tariffs, by Order dated September 21,
23 2020, modifying the application deadline from November 30 to September 30 for

1 customers to complete all requirements for service or main installation to
2 guarantee avoidance of base winter construction charges assessed for
3 construction occurring between December 1 and April 1. As a result of this
4 change, customers now have until September 30 to guarantee avoidance of
5 winter construction charges that apply for construction that occurs between
6 December and April.

7
8 The two scenarios where customers were not properly assessed charges for
9 winter construction involved customer requests that were submitted on October
10 13, 2020 and November 16, 2020, respectively, with construction occurring
11 through December 11, 2020 in both cases. Because these customers did not
12 meet the September 30 tariff deadline, they should have been subject to winter
13 construction charges for the period beginning December 1 but were not
14 assessed those charges.

15
16 These two cases reflect unusual circumstances created by the timing when
17 MERC's tariff changes were approved and these scenarios have not occurred
18 since.

19
20 Q. WHAT WERE THE RESULTS OF THE MAIN LINE EXTENSION REVIEW?

21 A. For each main line extension project, MERC reviewed design documents,
22 feasibility studies, and installation records. Projects that required CIACs were
23 researched to determine if the CIAC was properly charged and collected.

1
2

17
18
19
20
21
22
23

The review showed that of the 910 main line extension projects, 202 required a CIAC for a total of \$1,565,690.49. The review showed that the feasibility model was computed incorrectly for one project; that the full CIAC was not collected on two projects; and that winter construction charges were not appropriately billed for one project. Exhibit ____ (TFP-D), Schedule 3 both summarizes and details the results of the main line extension project review.

Q. Can you provide additional details regarding THE four cases where MERC identified issues with application of its tariff requirements for main extensions?

A. Similar to the two service extension projects discussed above, the one main extension project where winter construction charges were not assessed was due to the timing of when the project was ready. For the two projects where the full CIAC amount was not correctly billed, there was an error in the amount invoiced to the customer. Finally, in one case, the CIAC computed using the customer extension model incorrectly assumed additional customers as part of the extension, resulting in an understated CIAC.

Q. WHAT STEPS HAS THE COMPANY TAKEN TO ENSURE THE ACCURACY OF ITS EXTENSION PROCEDURES AND CIACS?

A. To minimize human errors, MERC has and will continue to provide employee training prior to each construction season about its extension, appropriate documentation, and records retention requirements. The results of this training

1 are evident in the fact that from May 2017 through April 2022, there were only a
2 handful of issues in the application of the main or service line extension
3 requirements.

4
5 Q. THE SECOND CONCERN EXPRESSED BY THE COMMISSION IN DOCKET
6 90-563 IS WHETHER THE EXTENSION TARIFFS ARE APPROPRIATELY
7 COST AND LOAD JUSTIFIED. PLEASE EXPLAIN WHETHER THAT IS THE
8 CASE.

9 A. MERC's customer extension model and extension tariffs are appropriately cost
10 and load justified. This footage allowance for residential service extensions and
11 application of the customer extension model have been reviewed and approved
12 by the Commission as an acceptable approach to customer extension that
13 protects both existing and new customers from undue cost. The load information
14 for all new commercial accounts is reviewed individually, while the residential
15 accounts are reviewed based on average load volumes across the entire
16 customer base. By adhering to the approved customer extension model, the
17 Company has appropriately cost and load justified the extension tariffs.

18

1 Q. THE THIRD CONCERN EXPRESSED BY THE COMMISSION IN DOCKET 90-
2 563 IS WHETHER WASTEFUL ADDITIONS TO PLANT AND FACILITIES ARE
3 ALLOWED INTO RATE BASE. PLEASE EXPLAIN WHY THE COMPANY'S
4 ADDITIONS ARE REASONABLE.

5 A. As noted above, the Company evaluates new projects using the Commission-
6 approved customer extension model and the Company adheres to its
7 Commission-approved tariff on main and service extensions. To the extent that a
8 CIAC is required, as described above, the Company will assess that CIAC to the
9 developer or customer as appropriate and as a result, no wasteful additions to
10 plant and facilities are allowed into rate base. MERC also complies with the
11 Commission's Order Adopting Standards Governing Competition Among Natural
12 Gas Utilities dated September 19, 2018 in Docket No. G999/CI-17-499, which
13 adopted principles with respect to duplication of natural gas facilities and
14 prohibited the use of promotional incentives in order to ensure natural gas
15 extensions are reasonable and not duplicative.

16

17 IX. ABNORMAL CONSTRUCTION CHARGES

18 Q. DOES YOUR TESTIMONY ADDRESS THE COMMISSION'S REQUIREMENTS
19 RELATING TO ABNORMAL CONSTRUCTION?

20 A. Yes. In Docket 90-563, the Commission directed MERC in future general rate
21 cases to demonstrate that abnormal construction charges are billed following
22 MERC's tariff. In Docket Nos. G007,011/M-07-1188 and G011/GR-17-563, the

1 Commission requested that MERC continue to address these requirements in its
2 future rate cases. My testimony addresses this requirement.

3
4 As discussed above, the Company may design and install a gas service line
5 where abnormal conditions (such as rock in the soil) exist, but only if it is possible
6 to safely install the line by special design or extra construction. The customer is
7 responsible for the additional costs that may arise from the special design or
8 extra construction required in these abnormal circumstances.

9
10 In preparation for this rate case, 50 instances of abnormal construction
11 conditions from May 2017 through April 2022 were reviewed, as shown in Exhibit
12 ____ (TFP-D), Schedule 4. All of the 50 were billed correctly to the customer and
13 MERC collected \$2,619,363 in abnormal construction charges as required under
14 the tariff.

15
16 **X. WINTER CONSTRUCTION**

17 Q. DOES YOUR TESTIMONY ADDRESS THE COMMISSION'S FILING
18 REQUIREMENT RELATING TO WINTER CONSTRUCTION CHARGES?

19 A. Yes. In Docket No. G007,011/M-07-1188, the Commission directed MERC to
20 demonstrate in its next general rate case that no Winter Construction Charges
21 were being assessed to customers outside the tariffed Winter Construction
22 Charges period (*i.e.*, December 1 through April 1), and that no Winter

1 Construction Charges incurred by the Company from any contractors were
2 assessed to ratepayers outside the tariffed Winter Construction Charges period.

3
4 In Docket No. G-011/GR-17-563, the Commission directed MERC in future
5 general rate cases to continue to address the reporting requirements of Docket
6 No. G007,011/M-07-1188 related to Winter Construction Charges.

7
8 Q. HOW HAS MERC ADDRESSED THE COMMISSION'S REQUIREMENT?

9 A. MERC conducted a search for all winter charges assessed in the months of
10 December through April (outside the tariffed Winter Construction period) between
11 May 1, 2017 and April 30, 2022.

12
13 MERC's review found no winter charge invoices for work completed outside the
14 tariffed Winter Construction Charge period. In accordance with the
15 Commission's Orders and the Company's tariff, Exhibit ____ (TFP-D), Schedule 5
16 documents that no such charges were incurred outside of the tariffed Winter
17 Construction Period.

18

1 **XI. FARM TAP INSPECTION PROGRAM**

2 Q. IN DOCKET NO. G011/M-91-989 AND G011/GR-17-563, THE COMMISSION
3 REQUIRED THE COMPANY TO FILE IN EACH GENERAL RATE CASE A
4 FIVE-YEAR REPORT ON THE CUMULATIVE RESULTS OF THE FARM TAP
5 INSPECTION PROGRAM AND ANY RECOMMENDATIONS FOR FUTURE
6 IMPROVEMENTS. DOES YOUR TESTIMONY ADDRESS THIS
7 REQUIREMENT?

8 A. Yes, it does. MERC is in year five of a five-year (2018-2022) farm tap inspection
9 plan. The current inspection report for 2017-2021 is attached to my testimony as
10 Exhibit _____ (TFP-D), Schedule 6.

11
12 Q. PLEASE PROVIDE A SUMMARY OF THE RESULTS OF THE INSPECTION
13 PROGRAM.

14 A. During the five-year period from 2017 through 2021, MERC inspected each farm
15 tap at least once, performing a total of 1,976 inspections. The inspections
16 discovered 92 leaks: 0 Class 1 leaks, 4 class 2 leaks, and 88 Class 3 leaks.

17
18 Since 2016, the number of farm taps has decreased due to NNG's removal of
19 unused taps, with 1,763²⁶ farm taps remaining as of 2021.
20

²⁶ This count includes both active and non-active (but not removed) farm taps.

1 Q. PLEASE DESCRIBE EACH CLASS OF LEAKS AND HOW MERC RESPONDS
2 TO THEM.

3 A. Class 1 leaks are those that represent an existing or probable hazard to persons
4 or property and require immediate repair or continuous action until the conditions
5 are no longer hazardous. When a Class 1 leak is discovered, gas service to a
6 farm tap fuel line is shut off until adequate repair or replacement is made. Class
7 2 leaks are non-hazardous at the time of detection but are repaired based on
8 probable future hazard. When a Class 2 leak is discovered, it is repaired within
9 six months of detection, and any such leak discovered after June 30 of any
10 calendar year must be repaired no later than December 31 of the same year or
11 ground freezing, whichever comes first. Class 3 leaks are those that are non-
12 hazardous at the time of detection and can reasonably be expected to remain
13 non-hazardous.

14
15 Q. DO YOU HAVE ANY RECOMMENDATIONS FOR FUTURE IMPROVEMENTS
16 TO THE FARM TAP INSPECTION PROGRAM?

17 A. As described above, MERC is implementing Phase II of its Farm Tap Project,
18 which includes the replacement of existing farm tap customer-owned lines
19 located within one mile of MERC's distribution system with utility-owned lines,
20 which will be subject to more stringent and thorough inspection. Additionally,
21 beginning in 2023, MERC will invest an additional \$250,000 each year to
22 implement an enhanced education program designed to inform farm tap

1 customers about the risks associated with farm taps and to encourage farm tap
2 customers to monitor their systems to ensure safety.

3

4

XII. CONCLUSION

5 Q. DOES THIS CONCLUDE YOUR DIRECT TESTIMONY?

6 A. Yes, it does.

Rochester Lateral Project (Costs through July 2022)

# MN Farm Taps	1763
% inspected-5 yr period	112.08%

New Services Installed	1
Line Replacements	4
Repairs	12

% MN Farm Taps w/Leaks-5 yr period	4.66%
------------------------------------	--------------

Percent of Farm Taps with Leaks - This is calculated by dividing the number of leaks by the number of inspections performed.

Leak Class 1 - A leak that represents an existing or probable hazard to persons or property, and requires immediate repair or continuous action until the conditions are no longer hazardous. Gas service to a farm tap fuel line is shut off until adequate repair or replacement has been made.

Leak Class 2 - A leak that is recognized as being non-hazardous at the time of detection, but justifies scheduled repair based on probable future hazard. Class 2 leaks shall be repaired within 6 months of detection, but any such leak discovered after June 30 of any calendar year shall be repaired no later than December 31 of the same year, or ground freezing, whichever comes first. In the event the leak is not repaired according to the preceding timeframe, gas service to a farm tap fuel line will be shut off until adequate repair or replacement is made.

Leak Class 3 - A leak that is non-hazardous at the time of detection and can reasonably be expected to remain non-hazardous. Re-evaluate during the next scheduled survey or within 15 months of the date reported, whichever comes first, until the leak is regraded or repaired.

Number of Leaks Found - The number of leaks by class are listed. When tabulating this number, if a line had more than 1 leak in a single class, all were counted.

Number of Inspections Performed - The total number of inspections completed during this 5-year period of inspections.

Percent of Lines Inspected - This percentage is based on the number of inspections performed and the number of farm tap meters that were identified in the Customer Information Billing System at the beginning of this 5-year period of inspections plus any farm taps added less farm taps that have been removed.

Percent Leaks by Class - This is calculated by dividing the number of leaks by class by the total number of leaks found. Multiple leaks on a single line are counted as individual leaks.
