
PURCHASED GAS ADJUSTMENT – UNIFORM CLAUSE

2nd Revised Sheet No. 7.00

1. Rates Subject to the Purchased Gas Adjustment (PGA) Clause: All gas utility rate schedules shall be subject to a gas cost adjustment as defined in 2. and 3. below. Since the Company purchases gas from different supply sources, the Company will determine the delivered cost of gas purchased by Supplier and implement any change in the billing rate which exceeds .3 cents per therm. The Company will also update its PGA every three months since the last change, which exceeded .3 cents per therm.

2. Determination of Purchased Gas Adjustment Amount: For purpose of computing the Purchased Gas Adjustment, the following formula will be used:

$$\frac{PD}{V} + WACOG + \frac{A}{V^I} - B = \text{Gas Cost Adjustment}$$

Where:

PD = Demand Cost: (1) The cost of purchased gas to be sold calculated by multiplying the current cost of purchased gas from each supplier times the last authorized demand volumes approved by the Commission and (2) The costs of firm transportation are calculated by multiplying the current cost from each supplier times the last demand volumes approved by the Commission.

WACOG = Projected weighted average cost of gas: The cost of purchased gas to be sold calculated by multiplying the estimated cost per dekatherm, therm or Btu by supplier (including transportation commodity costs) times the estimated purchase volumes by supplier for the upcoming month.

A = The current balance of unrecovered or over-recovered purchased gas costs. This is calculated once a year and filed each September 1 as explained in 5. on Sheet No. 7.01.

V = The sales volume for the forthcoming twelve month period ending August 31. The annual volumes shall:

- A. Be adjusted to reflect normal temperatures.
- B. Be for the most recent twelve months of the fourteen months immediately preceding the effective date of any demand increase or decrease.
- C. Once normalized, be further adjusted by an average percentage change in normalized sales computed over the preceding three year period.
- D. Also change in accordance with Minnesota Rules 7825.2390 - 7825.3000.

V^I = Projected 12 months sales volumes.

B = Actual purchased gas cost embedded in the gas utility filed rate schedules based on purchase and sales volumes established during the base period including all adjustments approved by the Commission.

PURCHASED GAS ADJUSTMENT – UNIFORM CLAUSE
(Continued)

2nd Revised Sheet No. 7.01

3. Application of Calculation

The formula $\frac{PD}{V} + WACOG + \frac{A}{V - B}$ identified previously will be calculated separately for each supplier and/or supply zone (where separate rate schedules are maintained), if appropriate by class of service for interruptible, firm and general service sales. Demand charges will be assigned on a unit basis to applicable customers.

4. Cost Included in the Purchased Gas Adjustment: The cost of gas included in the computation shall consist of all costs properly included in FERC Accounts 800 through 812, transportation charges and all other charges incurred to obtain gas supplies.

5. Frequency of Change: The underrecovery/overrecovery balance adjustments under this provision shall be computed and filed by September 1 of each year.

Accounting Requirement: Subsequent to the effective date of this clause, the Company shall maintain a continuing monthly comparison of the actual cost of gas as shown on the books and records of the Company, exclusive of refunds, and the cost recovery for the same month calculated by multiplying the volumes sold during said month by the currently effective rate for purchased gas. The difference in the actual cost of gas and the cost recovery represents the over/under recovery for the month. The total differences for the twelve-month period ending August 31 represent the balance of underrecovered or overrecovered purchased gas cost for the period. The balance for the period, plus the balance at the beginning of the period, and any adjustments represent the current balance in the Account (“A” in the formula above).

Costs included in the Purchased Gas Adjustment will be offset by the revenues collected from Company’s Small Volume Balancing Service on a yearly basis in the annual Reconciliation Adjustment.

The Company shall maintain an over/under account for each supply zone for the under-recovered or over-recovered purchased gas costs on a monthly basis.

6. Treatment of Refund: Refunds and interest thereon received from the suppliers of purchased gas that are attributable to the cost of gas previously sold will be refunded by credits to bills or by checks within a period not to exceed 90 days from the date the refund is received from a supplier, provided the refund amount per customer is equal to or greater than five dollars. The utility shall include the unrefunded balance as an adjustment to the balance of under recovered or over recovered purchased gas cost for the period as explained in the Accounting Requirements above.

7. Information to be Filed with the Commission: Each Purchased Gas Adjustment will be accomplished by filing an application and will be accompanied by such supporting data and information as the Commission may require.
