

Save with the Multifamily Energy Savings Program

We understand that multifamily buildings are unique and that managing operational costs is paramount. The Multifamily Energy Savings Program is a comprehensive efficiency program that will provide expert advice and recommendations on reducing natural gas use and your energy bill. And, you will see immediate savings from the direct installation of low-flow showerheads and faucet aerators. **All of this at no cost to you!**

Program benefits include:

- Installing energy-efficient and hot water-saving products.
- Providing an understanding of how your building uses energy.
- Identifying opportunities for you to save energy.
- Helping you prioritize savings opportunities.
- Assisting you through the implementation of energy-savings projects.
- Connecting you to qualified contractors, rebates and financing.
- Installation of LED light bulbs in properties with Rochester Public Utilities as the electric service providers.

Who is eligible?

Any multifamily building with five units or more that receives natural gas service from Minnesota Energy Resources for central heating and individual or central water heating. This includes low-income housing, 55 and over senior housing, assisted living, nursing homes, on-campus college housing and apartments.

How do I participate?

1. Begin by applying for the program at minnesotaenergyresources.com/multifamily or call 612-244-2450.
2. Schedule a building assessment and direct install visit.
3. Get help with implementing any energy savings projects, financing and rebates.
4. Start enjoying lower utility bills!
