

# Steam trap and boiler tune-up rebates

A boiler tune-up can help ensure your gas fired boiler is operating at maximum efficiency and can help avoid expensive repairs. Boilers are eligible for a tune-up rebate once every two years.

Maintaining steam trap operation is a smart way to improve steam system performance and potentially reduce unnecessary costs. Replacements or significant repairs of failed steam traps are eligible for rebates.

To apply for a rebate, download and fill out the **steam trap rebate application** and the **steam trap inventory worksheet**, or the **commercial boiler tune-up application**. Funding is limited and can change or end at any time. Applications will be processed on a first-come, first-served basis.

For additional questions on this program or to download an application, visit [minnesotaenergyresources.com](http://minnesotaenergyresources.com), call us at **866-872-0052, option 2**, or email us at [merc@appliedenergygroup.com](mailto:merc@appliedenergygroup.com).

## Rebates and minimum efficiency requirements

Equipment or service	Rebate
Steam trap replacement or significant repair*	50% of installed or repair costs up to \$250 per trap.
Boiler size 1,000,000 Btu/hr and larger	50% of tune-up costs up to \$500 per boiler.
Boiler size 300,000 to 999,999 Btu/hr	50% of tune-up costs up to \$250 per boiler.
Gas fired boiler tune-up (boiler size < 300,000 Btu/hr input)	\$50 per boiler

\* Orifice traps do not qualify for rebates.
