

# Turn-Key Efficiency Program

Get the resources you need to implement energy-saving projects and realize savings. Minnesota Energy Resources offers a variety of no-cost programs designed to help **commercial/industrial customers** save energy and impact the bottom-line.

Large commercial/industrial customers face unique barriers: uncertain fuel prices, freezes on capital spending, and more stringent corporate requirements for rate of return.

To help our customers overcome these challenges, Minnesota Energy Resources has designed the Turn-Key Efficiency Program. By taking advantage of this program, qualifying customers may be able to reduce monthly energy costs and shorten the payback period of new high-efficiency equipment and processes.

**These program services are available at no charge:**

- Introductory meeting with Minnesota Energy Resources program representatives to understand the program offerings and benefits
- A mid-level engineering study completed by industry energy experts to identify quality energy-efficiency

opportunities, including a complete review of existing energy project proposals and suggested strategies for implementation

- Assistance with energy plan creation, project prioritization, execution and access to applicable financial tools including local, state and federal resources
- Technical assistance throughout the project implementation process and post-study follow-up

**Rebates are based on a combination of energy saved and project implementation cost.**

**Rebates are awarded based on the lesser of:**

- Project buy down to one-year simple payback, **or**
- \$1 per therm saved during the first year, **or**
- Full incremental cost

## **Who is eligible?**

Minnesota Energy Resources customers who use 100,000 therms or greater of natural gas per year.

## **Get started today!**

Contact your local Minnesota Energy Resources external community relations leader for information on how to participate: [www.minnesotaenergyresources.com/company/staff.aspx](http://www.minnesotaenergyresources.com/company/staff.aspx)

For additional questions on this program, please call us at **855-786-1115**.
