

Duct sealing rebates for existing homes

Minnesota Energy Resources' **duct sealing rebates for existing homes** provide incentives to customers when aerosol duct sealing is installed by a licensed dealer.

Leaky ducts can reduce heating and cooling system efficiency by as much as 20%. Duct sealing and insulating increases efficiency, lowers your energy bills, and can pay for itself in energy savings while increasing the safety of your home.

Your home could be losing 25 to 40% of heating and cooling energy through gaps and holes in your existing furnace air ducts. This energy waste can be reduced with the use of aerosol duct sealing. This method of sealing ducts can reduce leaks by 70 to 90%.

Rebates and minimum efficiency requirements

Measure	Minimum efficiency		Rebate
	Pre-installation:	Post-installation:	
Aerosol duct sealing*	Where no insulation previously existed	Minimum reduction of 50%	\$2.50 per CFM reduction up to \$500

* Mastic tape sealing does not qualify.
This rebate is for existing homes only. New construction is not eligible.

To apply for a rebate, download and fill out the **residential duct sealing rebate application**. Funding is limited and can change or end at any time. Applications will be processed on a first-come, first-served basis.
