

Heating system tune-up rebate

Just like cars, heating systems that are regularly maintained will run more efficiently and last longer. The **Heating System Tune-Up Rebate** helps you make sure that your heating system is **operating at maximum efficiency** and can help you avoid expensive repairs.

Minnesota Energy Resources offers a \$35 rebate when a professional heating service technician performs a tune-up that includes the following seven services:

- Perform carbon monoxide test and correct any safety issues.
- Check flame characteristics, and adjust gas and/or air, if needed.
- Check flue gas path from burner to vent for cleanliness and cracks. Clean and report as necessary.
- Check the pilot/igniter for proper operation. Check the flame sensor/pilot light shut down controls for proper operation.

- Check the condition of the furnace air filter.
- Check condition of fan motor(s) and pump motor (for boilers). Lubricate bearings as needed.
- Check the operational controls and adjust, if necessary.

To apply for a rebate, download and fill out the **heating system tune-up rebate application**.

This program is for existing homes only. New construction is not eligible. Customers are eligible for a tune-up rebate every two years. Work must be completed by a licensed HVAC dealer. "Do it yourself" work is not eligible. Customers who have a service

agreement with an HVAC dealer are eligible provided that the service contract is provided with the rebate application.

Funding is limited and can change at any time. Applications will be processed on a first-come, first-served basis.
